MONTHLY REPORT

25X1

PAR 214

30 Jul 65

SUBJECT: Roller Transport Processor (12-Inch)

TASK/PROBLEM

1. Design and fabricate a versatile self-threading photographic processor capable of handling both cut sheet and continuous webs of photographic material and adaptable to a process yielding either standard negative or reversal images. Interchange between processes to be accomplished with a minimum of effort.

DISCUSSION

2. All sensitized materials and photographic processes referred to in the November revisions of the specifications have been checked out. The RT-12 processor has met all of these specifications satisfactorily.

PLANNED ACTIVITY

3. RT-12 processor will be shipped as scheduled.
